

A community-supported, weekly on-line magazine written by some of the most well-known names in grazing.

On Pasture

Research and Experience Translated Into Grazing Practices You Can Use NOW!

Welcome!

There's a lot of information out there to sift through and, without spending lots of time reading and listening to others, it's hard for a grazier to decide what to do.

With On Pasture, we've changed that. We're taking on the job of sifting through the piles of research and grazing practices, translating them into ideas that can work for you, and then putting together the simple steps for getting started. When it comes to science, we show you what the data means, in language that anyone can understand. Likewise, when we share experiences from other farmers and ranchers, we share their data in pictures and/or their bottom line, so you'll know that what they're doing has a solid foundation. And since everyone's operation is different, we'll give examples of how you can apply the results of research or what other farmers are doing to your place.

Each week you'll find something you can use whether it's *Grazing Management*, *Pasture Health*, *Livestock*, or *Money Matters*. Then we add some food for thought in *Consider This*, and give you a laugh with *The Funnies*.

Check us out. You'll be glad you did!

Our Readers Say

"Love what you're doing - fresh, current, educational - really fun!"

"What fine work and a most valuable contribution you are making to healthier and more prosperous family farming, agriculture and our Earth, ecologically and economically."

"Love the weekly newsletter. Nice non-techno explanations of important "scientific" topics, and fresh ways of revisiting familiar, practical concepts. Like talking to a friend."

"I'm an Australian subscriber to your brilliant e-newsletter. I eagerly anticipate your info each week and really want to say "Bravo" on delivering such useful, relevant and diverse info."

"I'd like to say how much I enjoy the articles. Facts, and interesting presentations that are enjoyable to read."

"Another great issue....Keep up the good work!"

"I'm really enjoying your new On Pasture publication and am going to subscribe from my farm email so I can find time to read more of the articles."
